

UNSW Course Outline

AGSM9152 Digital Strategy (Virtual Weekly) - 2024

Published on the 04 Nov 2024

General Course Information

Course Code : AGSM9152

Year : 2024

Term : Term 3

Teaching Period : T3

Is a multi-term course? : No

Faculty : UNSW Business School

Academic Unit : AGSM MBA Programs

Delivery Mode : Multimodal

Delivery Format : Standard

Delivery Location : Online - Synchronous

Campus : Sydney

Study Level : Postgraduate

Units of Credit : 6

Course Details & Outcomes

Course Description

NOTE: *This course was previously identified as MBAX9152.*

This course focuses on the role of strategising in the digital era and has three main themes.

1. Why digital strategy matters. We begin with an examination of the strategic role and organisational value of digital technologies, including digitally enabled innovation, and digital transformation and disruption.
2. Current trends and case studies. We then move to consideration of contemporary trends pertaining to digital strategy. We will explore the strategic management of digital technologies required to realise value potential, including current and emerging approaches and frameworks for digital strategising.
3. How to formulate a digital strategy. This final theme of the course revolves around the processes of ideation and drafting of strategy design, and relevant policies, governance and frameworks.

Course Aims

This course will equip students with a deep understanding of the role of digital strategy within organisations as an enabler for maintaining viable and relevant business models and also as a vehicle for driving innovative initiatives.

Course Learning Outcomes

Course Learning Outcomes	Program learning outcomes
CL01 : Describe and apply relevant frameworks, tools and concepts for analysing and constructing a digital strategy.	• PL01 : Business Knowledge
CL02 : Analyse and recommend digital business models leveraging the opportunities provided by digitisation.	• PL01 : Business Knowledge • PL02 : Problem Solving
CL03 : Demonstrate knowledge of digital trends and critically analyse their strategic value in the context of digital strategising.	• PL01 : Business Knowledge • PL03 : Business Communication
CL04 : Formulate and deliver a well-structured and professionally presented digital strategy covering key components of industry and business strategy analysis, digital trends and recommendations.	• PL02 : Problem Solving • PL03 : Business Communication
CL05 : Reflect critically about key concepts and issues pertaining to digital strategy and communicate your reflections effectively.	• PL01 : Business Knowledge • PL03 : Business Communication
CL06 : Identify the social, ethical and sustainability aspects of digital strategising and understand their importance to responsible business practices in organisations.	• PL01 : Business Knowledge • PL05 : Responsible Business Practice

Learning and Teaching Technologies

Moodle - Learning Management System | Microsoft Teams

Additional Course Information

Course structure

Unit 1, Strategic value of digital technologies, explores the concept of strategic value, including what strategic value entails, how it relates to digital technologies (DT), how organisations can measure it, and ethical considerations in strategic DT use.

Unit 2, Innovating with digital technologies, explores digital innovation and the processes and approaches to innovating with digital technology (DT). While organisations recognise that digital business innovation is the key to their survival and success, they do not necessarily understand what it means to innovate with DT, what are potential approaches to innovation and how to instigate and manage innovation.

Unit 3, Digitally enabled disruption, introduces and examines the notion of digitally enabled

disruption. Newly established companies are challenging the traditional organising logics of incumbent companies and industries through relentless innovation - a process popularly termed 'digital disruption'. What is enabling or giving rise to such disruptive forces? How do new entrants leverage digitisation and digitisation to craft innovative business models? These are some of the questions that we explore in this Unit.

Unit 4, Digitally enabled transformation. Digital disruption is a serious threat to incumbents that has caused turmoil in extant industries. Its impact on industries such as banking and finance, transportation and hospitality, to name a few, has been well-documented. In this Unit, we shift our attention to how incumbents can respond to and counter the threat of digital disruption via digital transformation initiatives. Additionally, we examine the organisation-level implications and imperatives of such digital- transformation initiatives.

Unit 5, Digital platform ecosystem strategy, examines the impact of digitisation on business and society. Digitisation is fundamentally reshaping how consumers and producers interact, how value is created and captured, and how humans organise and work. The continued digitisation has challenged incumbents following a traditional business model, and afforded opportunities to newer ventures.

Unit 6, Strategic digital technology decisions, examines the nature and practical complexities of strategic digital technology decision-making. Strategic decisions are complex. They have the potential to substantially impact organisational performance (for better or for worse), require substantial resources and time to implement, and are difficult to reverse.

In *Unit 7, Frameworks for digital strategising,* we turn the focus to the methods organisations can use to bring more structure and predictability to their digital strategising processes. This structured approach usually begins with setting a high-level strategy, then gradually translating the strategic goals into concrete initiatives.

In *Unit 8, Governance of digital technologies,* we turn our attention to establishing an overarching framework for decision processes. Digital governance is about specifying the decision rights and frameworks related to organisational investment in and use of DT. It determines a clear, transparent process for how different types of DT decisions should be made.

Unit 9, Managing digital services delivery, focuses on the management of digital services including issues associated with the acquisition, sourcing and application of technology and related services.

Unit 10, *Trends in digital strategy-making*, opens a broader perspective on digital strategy-making and strategising and we will reflect on emerging business and social transformation and the future they are creating.

Assessments

Assessment Structure

Assessment Item	Weight	Relevant Dates	Program learning outcomes
Assessment 1: Participation Assessment Format: Individual	20%	Due Date: In class	• PLO1 : Business Knowledge • PLO3 : Business Communication
Assessment 2: Reflections Assessment Format: Individual	15%	Due Date: Sundays of Weeks 3, 5, 7 and 9 by 11.59pm Sydney time	• PLO1 : Business Knowledge • PLO3 : Business Communication
Assessment 3: Analyse a digital strategy Assessment Format: Individual	35%	Due Date: Monday of Week 8 by 3pm Sydney time	• PLO1 : Business Knowledge • PLO2 : Problem Solving • PLO3 : Business Communication
Assessment 4: Develop a digital strategy Assessment Format: Group	30%	Due Date: Wednesday of Week 10 in class	• PLO1 : Business Knowledge • PLO2 : Problem Solving • PLO3 : Business Communication • PLO5 : Responsible Business Practice

Assessment Details

Assessment 1: Participation

Assessment Overview

You will be assessed on your participation in class discussions and/or activities.

Course Learning Outcomes

- CLO2 : Analyse and recommend digital business models leveraging the opportunities provided by digitisation.
- CLO3 : Demonstrate knowledge of digital trends and critically analyse their strategic value in the context of digital strategising.

Assessment Length

Not applicable

Generative AI Permission Level

Planning/Design Assistance

You are permitted to use generative AI tools, software or services to generate initial ideas, structures, or outlines. However, you must develop or edit those ideas to such a significant extent that what is submitted is your own work, i.e., what is generated by the tool, software or service should not be a part of your final submission. You should keep copies of your iterations to show your Course Authority if there is any uncertainty about the originality of your work.

If your Convenor has concerns that your answer contains passages of AI-generated text or media that have not been sufficiently modified you may be asked to explain your work, but we recognise that you are permitted to use AI generated text and media as a starting point and some traces may remain. If you are unable to satisfactorily demonstrate your understanding of your submission you may be referred to UNSW Conduct & Integrity Office for investigation for academic misconduct and possible penalties.

For more information on Generative AI and permitted use please see [here](#).

Assessment 2: Reflections

Assessment Overview

You will keep a journal reflecting on your learning throughout the course.

Course Learning Outcomes

- CL01 : Describe and apply relevant frameworks, tools and concepts for analysing and constructing a digital strategy.
- CL03 : Demonstrate knowledge of digital trends and critically analyse their strategic value in the context of digital strategising.
- CL05 : Reflect critically about key concepts and issues pertaining to digital strategy and communicate your reflections effectively.

Assessment Length

1-minute video or audio posting on Moodle per reflection

Generative AI Permission Level

Planning/Design Assistance

You are permitted to use generative AI tools, software or services to generate initial ideas, structures, or outlines. However, you must develop or edit those ideas to such a significant extent that what is submitted is your own work, i.e., what is generated by the tool, software or service should not be a part of your final submission. You should keep copies of your iterations to show

your Course Authority if there is any uncertainty about the originality of your work.

If your Convenor has concerns that your answer contains passages of AI-generated text or media that have not been sufficiently modified you may be asked to explain your work, but we recognise that you are permitted to use AI generated text and media as a starting point and some traces may remain. If you are unable to satisfactorily demonstrate your understanding of your submission you may be referred to UNSW Conduct & Integrity Office for investigation for academic misconduct and possible penalties.

For more information on Generative AI and permitted use please see [here](#).

Assessment 3: Analyse a digital strategy

Assessment Overview

You will focus on a digital trend, examine (using a digital-strategy lens) how an organisation has adopted that trend and critically evaluate if they have been successful in adopting it.

Course Learning Outcomes

- CL01 : Describe and apply relevant frameworks, tools and concepts for analysing and constructing a digital strategy.
- CL02 : Analyse and recommend digital business models leveraging the opportunities provided by digitisation.
- CL03 : Demonstrate knowledge of digital trends and critically analyse their strategic value in the context of digital strategising.

Assessment Length

5-minute recorded, narrated presentation, with 15 slides

Generative AI Permission Level

Planning/Design Assistance

You are permitted to use generative AI tools, software or services to generate initial ideas, structures, or outlines. However, you must develop or edit those ideas to such a significant extent that what is submitted is your own work, i.e., what is generated by the tool, software or service should not be a part of your final submission. You should keep copies of your iterations to show your Course Authority if there is any uncertainty about the originality of your work.

If your Convenor has concerns that your answer contains passages of AI-generated text or media that have not been sufficiently modified you may be asked to explain your work, but we recognise that you are permitted to use AI generated text and media as a starting point and some traces may remain. If you are unable to satisfactorily demonstrate your understanding of your submission you may be referred to UNSW Conduct & Integrity Office for investigation for

academic misconduct and possible penalties.

For more information on Generative AI and permitted use please see [here](#).

Assessment 4: Develop a digital strategy

Assessment Overview

In teams, you will formulate a digital strategy covering key components of industry and business strategy analysis, digital trends and recommendations.

Course Learning Outcomes

- CLO2 : Analyse and recommend digital business models leveraging the opportunities provided by digitisation.
- CLO4 : Formulate and deliver a well-structured and professionally presented digital strategy covering key components of industry and business strategy analysis, digital trends and recommendations.
- CLO6 : Identify the social, ethical and sustainability aspects of digital strategising and understand their importance to responsible business practices in organisations.

Assessment Length

7-minute in-class presentation, plus 3 minutes of Q&A

Generative AI Permission Level

Planning/Design Assistance

You are permitted to use generative AI tools, software or services to generate initial ideas, structures, or outlines. However, you must develop or edit those ideas to such a significant extent that what is submitted is your own work, i.e., what is generated by the tool, software or service should not be a part of your final submission. You should keep copies of your iterations to show your Course Authority if there is any uncertainty about the originality of your work.

If your Convenor has concerns that your answer contains passages of AI-generated text or media that have not been sufficiently modified you may be asked to explain your work, but we recognise that you are permitted to use AI generated text and media as a starting point and some traces may remain. If you are unable to satisfactorily demonstrate your understanding of your submission you may be referred to UNSW Conduct & Integrity Office for investigation for academic misconduct and possible penalties.

For more information on Generative AI and permitted use please see [here](#).

General Assessment Information

Grading Basis

Standard

Requirements to pass course

Students are expected to attempt all assessment requirements, and must achieve a composite mark of at least 50 out of 100 to pass the course.

Students are also expected to actively engage in course learning activities. Failure to engage in assessment tasks that are integrated into learning activities (e.g. class discussion, presentations) will be reflected in the marks for these assessable activities.

Course Schedule

Teaching Week/Module	Activity Type	Content
Week 1 : 9 September - 15 September	Topic	Unit 1: Strategic value of digital technologies
	Assessment	Assessment 1: Participation
Week 2 : 16 September - 22 September	Topic	Unit 2: Innovating with digital technologies
	Assessment	Assessment 1: Participation
Week 3 : 23 September - 29 September	Topic	Unit 3: Digitally enabled disruption
	Assessment	Assessment 1: Participation Assessment 2: Reflection due on Sunday by 11.59pm Sydney time
Week 4 : 30 September - 6 October	Topic	Unit 4: Digitally enabled transformation
	Assessment	Assessment 1: Participation
Week 5 : 7 October - 13 October	Topic	Unit 5: Digital platform ecosystem strategy
	Assessment	Assessment 1: Participation Assessment 2: Reflection due on Sunday by 11.59pm Sydney time
Week 6 : 14 October - 20 October	Topic	Unit 6: Strategic digital technology decisions
	Assessment	Assessment 1: Participation
Week 7 : 21 October - 27 October	Topic	Unit 7: Frameworks for digital strategising
	Assessment	Assessment 1: Participation Assessment 2: Reflection due on Sunday by 11.59pm Sydney time
Week 8 : 28 October - 3 November	Topic	Unit 8: Governance of digital technologies
	Assessment	Assessment 1: Participation Assessment 3: Analyse a digital strategy due on Monday by 3pm Sydney time
Week 9 : 4 November - 10 November	Topic	Unit 9: Managing digital services delivery
	Assessment	Assessment 1: Participation Assessment 2: Reflection due on Sunday by 11.59pm Sydney time
Week 10 : 11 November - 17 November	Topic	Unit 10: Trends in digital strategy-making
	Assessment	Assessment 1: Participation Assessment 4: Develop a digital strategy due in class

Attendance Requirements

Students must have a reliable internet connection and a working laptop/computer with camera, and attend the scheduled 90-minute online classes in Weeks 1 to 10. There are also other required online asynchronous activities outside of class times.

Course Resources

Prescribed Resources

You have four major resources to help you learn:

1. The course materials, which you will access via your Moodle class. You will do much of your learning outside the classroom by working through the course materials, and by completing the activities as they arise.
2. Your interaction with your Facilitator. The Facilitator's job is to guide your learning by conducting the online or face-to-face discussion, answering questions that might arise after you have done the week's work, providing insights from their practical experience and understanding of theory, providing you with feedback on your assessments, and directing discussions and debates that will occur between you and your co-participants in the course.
3. Your co-participants. Your course colleagues are an invaluable potential source of learning for you. Their work and life, and their willingness to question and argue with the course materials, the Facilitator and your views, represent a great learning opportunity. They bring much valuable insight to the learning experience.
4. There is a prescribed textbook for this course, and students will be provided with a digital version of this text in Moodle via the VitalSource platform: Peppard, J & Ward, J 2016, *The strategic management of information systems: Building a digital strategy*, 4th edn, John Wiley & Sons, Hoboken.

Course Evaluation and Development

Assessments have been reviewed and revised in response to student feedback.

Other Useful Information

Academic Information

COURSE POLICIES AND SUPPORT

The Business School expects that you are familiar with the contents of this course outline and the UNSW and Business School learning expectations, rules, policies and support services as

listed below:

- Program Learning Outcomes
- Academic Integrity and Plagiarism
- Student Responsibilities and Conduct
- Special Consideration
- Protocol for Viewing Final Exam Scripts
- Student Learning Support Services

Further information is provided on the [Policies and Guidelines](#) page.

Students may not circulate or post online any course materials such as handouts, exams, syllabi or similar resources from their courses without the written permission of their instructor.

STUDENT LEARNING OUTCOMES

The Course Learning Outcomes (CLOs) – under the Outcomes tab – are what you should be able to demonstrate by the end of this course, if you participate fully in learning activities and successfully complete the assessment items.

CLOs also contribute to your achievement of the Program Learning Outcomes (PLOs), which are developed across the duration of a program. PLOs are, in turn, directly linked to [UNSW graduate capabilities](#). More information on Coursework PLOs is available on the [Policies and Guidelines](#) page. For PG Research PLOs, including MPDBS, please refer to [UNSW HDR learning outcomes](#).

Academic Honesty and Plagiarism

As a student at UNSW you are expected to display [academic integrity](#) in your work and interactions. Where a student breaches the [UNSW Code of Conduct](#) with respect to academic integrity, the University may take disciplinary action. To assure academic integrity, you may be required to demonstrate reasoning, research and the process of constructing work submitted for assessment.

To assist you in understanding what academic integrity means, and how to ensure that you do comply with the UNSW Code of Conduct, it is strongly recommended that you complete the [Working with Academic Integrity](#) module before submitting your first assessment task. It is a free, online self-paced Moodle module that should take about one hour to complete.

Submission of Assessment Tasks

SHORT EXTENSIONS

Short Extension is a new process that allows you to apply for an extended deadline on your assessment without the need to provide supporting documentation, offering immediate approval during brief, life-disrupting events. Requests are automatically approved once submitted.

Short extensions are ONLY available for some assessments. Check your course outline or Moodle to see if this is offered for your assessments. Where a short extension exists, all students enrolled in that course in that term are eligible to apply. Further details are available the UNSW [Current Students](#) page.

SPECIAL CONSIDERATION

You can apply for special consideration when illness or other circumstances beyond your control interfere with your performance in a specific assessment task or tasks, including online exams. Special consideration is primarily intended to provide you with an extra opportunity to demonstrate the level of performance of which you are capable.

Applications can only be made online and will NOT be accepted by teaching staff. Applications will be assessed centrally by the Case Review Team, who will update the online application with the outcome and add any relevant comments. The change to the status of the application immediately sends an email to the student and to the assessor with the outcome of the application. The majority of applications will be processed within 3-5 working days.

For further information, and to apply, see Special Consideration on the UNSW [Current Students](#) page.

LATE SUBMISSION PENALTIES

LATE SUBMISSION PENALTIES

For assessments other than examinations, late submission will incur a penalty of 5% per day or part thereof (including weekends) from the due date and time. An assessment will not be accepted after 5 days (120 hours) of the original deadline unless special consideration has been approved. In the case of an approved Equitable Learning Plan (ELP) provision, special consideration or short extension, the late penalty applies from the date of approved time

extension. After five days from the extended deadline, the assessment cannot be submitted.

An assessment is considered late if the requested format, such as hard copy or electronic copy, has not been submitted on time or where the 'wrong' assessment has been submitted.

For assessments which account for 10% or less of the overall course grade, and where answers are immediately discussed or debriefed, the LIC may stipulate a different penalty. Details of such late penalties will be available on the course Moodle page.

FEEDBACK ON YOUR ASSESSMENT TASK PERFORMANCE

Feedback on student performance from formative and summative assessment tasks will be provided to students in a timely manner. Assessment tasks completed within the teaching period of a course, other than a final assessment, will be assessed and students provided with feedback, with or without a provisional result, within 10 working days of submission, under normal circumstances. Feedback on continuous assessment tasks (e.g. laboratory and studio-based, workplace-based, weekly quizzes) will be provided prior to the midpoint of the course.

Faculty-specific Information

PROTOCOL FOR VIEWING FINAL EXAM SCRIPTS

UNSW students have the right to view their final exam scripts, subject to a small number of very specific exemptions. The UNSW Business School has set a [protocol](#) under which students may view their final exam script. Individual schools within the Faculty may also set up additional local processes for viewing final exam scripts, so it is important that you check with your School.

If you are completing courses from the following schools, please note the additional school-specific information:

- Students in the **School of Accounting, Auditing & Taxation** who wish to view their final examination script should also refer to [this page](#).
- Students in the **School of Banking & Finance** should also refer to [this page](#).
- Students in the **School of Information Systems & Technology Management** should also refer to [this page](#).

COURSE EVALUATION AND DEVELOPMENT

Feedback is regularly sought from students and continual improvements are made based on this feedback. At the end of this course, you will be asked to complete the [myExperience survey](#),

which provides a key source of student evaluative feedback. Your input into this quality enhancement process is extremely valuable in assisting us to meet the needs of our students and provide an effective and enriching learning experience. The results of all surveys are carefully considered and do lead to action towards enhancing educational quality.

QUALITY ASSURANCE

The Business School is actively monitoring student learning and quality of the student experience in all its programs. A random selection of completed assessment tasks may be used for quality assurance, such as to determine the extent to which program learning goals are being achieved. The information is required for accreditation purposes, and aggregated findings will be used to inform changes aimed at improving the quality of Business School programs. All material used for such processes will be treated as confidential.

TEACHING TIMES AND LOCATIONS

Please note that teaching times and locations are subject to change. Students are strongly advised to refer to the [Class Timetable website](#) for the most up-to-date teaching times and locations.
