

## UNSW Course Outline

# PHYS4142 Statistical Physics (Honours) - 2024

Published on the 28 Feb 2024

## General Course Information

Course Code : PHYS4142

Year : 2024

Term : Term 1

Teaching Period : T1

Is a multi-term course? : No

Faculty : Faculty of Science

Academic Unit : School of Physics

Delivery Mode : Multimodal

Delivery Format : Standard

Delivery Location : Kensington

Campus : Sydney

Study Level : Undergraduate

Units of Credit : 6

## Course Details & Outcomes

### Course Description

In this Honours course, students will be introduced to concepts and methods in advanced statistical physics which will allow them to understand a wide range of effects encountered in many-body systems. The course will cover the subjects of mean field theory, phase transitions,

critical phenomena, the physics of non-equilibrium processes as well as a selection of more specialized topics.

## Course Aims

This is the highest undergraduate course in statistical physics and will provide students with a broad and comprehensive understanding and a foundation for further study and research.

## Course Learning Outcomes

Course Learning Outcomes
CL01 : recall and demonstrate understanding of core principles of statistical physics
CL02 : Develop an understanding of, and ability to solve, a wide range of problems in statistical physics
CL03 : Understand and develop facility with all syllabus material as a foundation for future research and professional activity

Course Learning Outcomes	Assessment Item
CL01 : recall and demonstrate understanding of core principles of statistical physics	<ul style="list-style-type: none"><li>• Final Exam</li><li>• Assignments</li></ul>
CL02 : Develop an understanding of, and ability to solve, a wide range of problems in statistical physics	<ul style="list-style-type: none"><li>• Final Exam</li><li>• Assignments</li></ul>
CL03 : Understand and develop facility with all syllabus material as a foundation for future research and professional activity	<ul style="list-style-type: none"><li>• Final Exam</li><li>• Assignments</li></ul>

## Learning and Teaching Technologies

Moodle - Learning Management System

## Assessments

### Assessment Structure

Assessment Item	Weight	Relevant Dates
Final Exam	60%	
Assignments	40%	

# Assessment Details

## Final Exam

### Assessment Overview

Final exam. 2 hour closed book exam. This will consist of a number of quantitative problems relating to the theory and applications of statistical mechanics.

Student advised of marks

### Course Learning Outcomes

- CL01 : recall and demonstrate understanding of core principles of statistical physics
- CL02 : Develop an understanding of, and ability to solve, a wide range of problems in statistical physics
- CL03 : Understand and develop facility with all syllabus material as a foundation for future research and professional activity

## Assignments

### Assessment Overview

Two quantitative assignments, each worth 20%. Each assignment should require a maximum of 10 hours out-of-class work to complete.

Marked assignments returned with comments

### Course Learning Outcomes

- CL01 : recall and demonstrate understanding of core principles of statistical physics
- CL02 : Develop an understanding of, and ability to solve, a wide range of problems in statistical physics
- CL03 : Understand and develop facility with all syllabus material as a foundation for future research and professional activity

## General Assessment Information

### Grading Basis

Standard

## Course Schedule

## Attendance Requirements

Students are strongly encouraged to attend all classes and review lecture recordings.

# Staff Details

Position	Name	Email	Location	Phone	Availability	Equitable Learning Services Contact	Primary Contact
Convenor	Oleg Sushkov					No	Yes
Lecturer	Dimi Culcer					No	No
Year coordinator	Michael Schmidt					No	No
Administrator	Zofia Krawczyk-Bernotas					No	No

## Other Useful Information

### Academic Information

Upon your enrolment at UNSW, you share responsibility with us for maintaining a safe, harmonious and tolerant University environment.

You are required to:

- Comply with the University's conditions of enrolment.
- Act responsibly, ethically, safely and with integrity.
- Observe standards of equity and respect in dealing with every member of the UNSW community.
- Engage in lawful behaviour.
- Use and care for University resources in a responsible and appropriate manner.
- Maintain the University's reputation and good standing.

For more information, visit the [UNSW Student Code of Conduct Website](#).

### Academic Honesty and Plagiarism

**Referencing** is a way of acknowledging the sources of information that you use to research your assignments. You need to provide a reference whenever you draw on someone else's words, ideas or research. Not referencing other people's work can constitute plagiarism.

Further information about referencing styles can be located at <https://student.unsw.edu.au/referencing>

**Academic integrity** is fundamental to success at university. Academic integrity can be defined as a commitment to six fundamental values in academic pursuits: honesty, trust, fairness, respect, responsibility and courage. At UNSW, this means that your work must be your own, and others'

ideas should be appropriately acknowledged. If you don't follow these rules, plagiarism may be detected in your work.

Further information about academic integrity, plagiarism and the use of AI in assessments can be located at:

- The [Current Students site](#),
- The [ELISE training site](#), and
- The [Use of AI for assessments](#) site.

The Student Conduct and Integrity Unit provides further resources to assist you to understand your conduct obligations as a student: <https://student.unsw.edu.au/conduct>

## Submission of Assessment Tasks

### Penalty for Late Submissions

UNSW has a standard late submission penalty of:

- 5% per day,
- for all assessments where a penalty applies,
- capped at five days (120 hours) from the assessment deadline, after which a student cannot submit an assessment, and
- no permitted variation.

***Any variations to the above will be explicitly stated in the Course Outline for a given course or assessment task.***

Students are expected to manage their time to meet deadlines and to request extensions as early as possible before the deadline.

### Special Consideration

If circumstances prevent you from attending/completing an assessment task, you must officially apply for special consideration, usually within 3 days of the sitting date/due date. You can apply by logging onto myUNSW and following the link in the My Student Profile Tab. Medical documentation or other documentation explaining your absence must be submitted with your application. Once your application has been assessed, you will be contacted via your student email address to be advised of the official outcome and any actions that need to be taken from there. For more information about special consideration, please visit: <https://student.unsw.edu.au/special-consideration>

**Important note:** UNSW has a “fit to sit/submit” rule, which means that if you sit an exam or

submit a piece of assessment, you are declaring yourself fit to do so and cannot later apply for Special Consideration. This is to ensure that if you feel unwell or are faced with significant circumstances beyond your control that affect your ability to study, you do not sit an examination or submit an assessment that does not reflect your best performance. Instead, you should apply for Special Consideration as soon as you realise you are not well enough or are otherwise unable to sit or submit an assessment.
