

UNSW Course Outline

CDEV6000 Partnered Work Project - 2024

Published on the 17 Jan 2024

General Course Information

Course Code : CDEV6000

Year : 2024

Term : Summer

Teaching Period : U1

Is a multi-term course? : No

Faculty : DVC (Academic) Board of Studies

Academic Unit : DVC (Academic) Board of Studies

Delivery Mode : In Person

Delivery Format : Standard

Delivery Location : Kensington

Campus : Sydney

Study Level : Postgraduate

Units of Credit : 6

Course Details & Outcomes

Course Description

CDEV6000 Partnered Work Project is an innovative, experiential course designed to enable students to integrate their specialised knowledge with professional practice by working directly with a client organisation (industry, community and government) on a real-world project.

Students will develop their professional practice (including teamwork, project management, complex problem solving, design thinking, and communication skills) as well as their personal capabilities for lifelong learning and work. Students work in inter-disciplinary teams with engagement with their project partner and an academic Project Supervisor who assists in maximising learning and the quality of the project deliverables.

Course Aims

By the end of this course students will have had the opportunity to:

1. integrate their specialised knowledge and skills with professional practice through working with a partner organisation;
2. analyse critically and synthesise complex information to develop solutions to real-world problems and situations;
3. operate effectively in an interdisciplinary context;
4. interpret and transmit ideas to specialist and non-specialist audiences;
5. demonstrate development of professional skills including teamwork, project management, self-management, complex problem solving, design thinking, and communication; and
6. demonstrate through reflective practice the development of personal skills and attributes including adaptability and responsibility as a learner.

Course Learning Outcomes

Course Learning Outcomes
CL01 : Integrate specialised knowledge and skills with professional practice through working with a partner organisation
CL02 : Analyse critically and synthesise complex information to develop solutions to real-world problems and situations
CL03 : Operate effectively in an interdisciplinary context
CL04 : Interpret and transmit ideas to specialist and non-specialist audiences
CL05 : Demonstrate development of professional skills including teamwork, project management, self-management, complex problem solving, design thinking, and communication
CL06 : Demonstrate through reflective practice the development of personal skills and attributes including adaptability and responsibility as a learner

Course Learning Outcomes	Assessment Item
CL01 : Integrate specialised knowledge and skills with professional practice through working with a partner organisation	
CL02 : Analyse critically and synthesise complex information to develop solutions to real-world problems and situations	
CL03 : Operate effectively in an interdisciplinary context	
CL04 : Interpret and transmit ideas to specialist and non-specialist audiences	
CL05 : Demonstrate development of professional skills including teamwork, project management, self-management, complex problem solving, design thinking, and communication	
CL06 : Demonstrate through reflective practice the development of personal skills and attributes including adaptability and responsibility as a learner	

Learning and Teaching Technologies

Moodle - Learning Management System | Microsoft Teams

Learning and Teaching in this course

The pedagogy underpinning this course is based on the belief that learning is an active process requiring engagement and immersion.

Due to the dynamic nature of real-world project work this course is highly interactive and activity-based. It utilises innovative and varied hybrid learning, teaching, and assessment strategies

designed to apply content to the design of the project delivery.

The course assumes the ability and willingness of students to actively engage in class and to take on an interdisciplinary approach.

There are four main aspects of this course:

- **preparation, academic knowledge and skill development** – getting ready for your project work through interactive workshops, subject matter expertise, readings, online resources, and activities;
- **team project** – with supervision/feedback by academic and partner organisation staff;
- **debriefing and reflective activities** – ongoing review and reflection to ensure progress, contextualised work, examination of assumptions, and project review; and
- **assessment** - to consolidate, deepen, and extend learning and understanding.

Research has consistently shown that experiential learning and ‘learning by doing’ is extremely effective. Research also shows that experience alone is not enough, and that it is *reflection, debriefing and discussion with others* that helps to make sense of experience and ensures that these learnings are accessible in the future. Understanding the ‘what and how’ of doing something is important, but it is even more important to know why you are doing something, and the values, beliefs, and assumptions that affect your decision making. This is why effective reflection is recognised as a significant and valued professional skill and this course will help you develop this capability.

Additional Course Information

The University provides a wide range of support services for students, including:

Moodle eLearning Support

For online help using Moodle, go to: <https://student.unsw.edu.au/moodle-support> For technical support, email: itservicecentre@unsw.edu.au; Phone: 9385 1333.

UNSW Academic Skills

<https://www.student.unsw.edu.au/skills>

Provides academic skills support services, including workshops and resources, for all UNSW students. See website for details.

Library services and facilities for students

<https://www.library.unsw.edu.au/study/services-for->

IT Service Centre

<https://www.myit.unsw.edu.au>

Provides technical support to troubleshoot problems with logging into websites, downloading documents, etc. Office: UNSW Library Annexe (Ground floor).

Phone: 9385 1333.

UNSW Counselling and Psychological Services

<https://student.unsw.edu.au/wellbeing>

Provides support and services if you need help with your personal life, getting your academic life back on track or just want to know how to stay safe, including free, confidential counselling.

Office: Level 2, East Wing, Quadrangle Building; Phone: 9385 5418; Email:

counselling@unsw.edu.au

Equitable Learning Services

<https://student.unsw.edu.au/els>

Provides assistance to students who are trying to manage the demands of university as well as a health condition, learning disability or have personal circumstances that are having an impact on their studies.

Phone: 02 8374 9201; Email: els@unsw.edu.au

Assessments

Assessment Structure

Assessment Item	Weight	Relevant Dates
-----------------	--------	----------------

Assessment Details

General Assessment Information

Assessment 1: Team Project Plan 15% (10% team mark + 5% peer assessment individual mark)

Presentation: due during class on Thursday of Week 1

Peer assessment: due at 9pm on Thursday of Week 1

This is a team assessment task. In their project team, students will give a 15-minute presentation on their Project Plan to the Partner and course academics **during class in Week 1**. This will provide the opportunity to receive early feedback from the Partner on the team’s intended deliverable.

The Team Project Plan must include:

- project problem definition
- project aims and rationale
- project plan with indicative timeline
- expected outcomes
- expected deliverables
- risks and any other challenges
- the scope re-stated as a basis for developing solutions in the next phase

Students will receive a team mark out of 10 with an additional peer assessment mark out of 5 for their individual contribution (15% weighing in total). Details of your peer review and how to peer assess will be provided in the assessment materials on Teams.

You will find additional information on this assessment task and the marking rubric in the assessment materials on Teams. In addition to partner oral feedback on the day students will receive written feedback on this assessment before completing Assessment Tasks Three and Four. Please note that a pre-recorded version of the talk is also required to be submitted at 6pm on the day before the presentation, being Wednesday of Week 1.

2. Team Presentation 15% (5% team mark + 10% individual mark)

Due during class on Tuesday of Week 4

During the final Week 4 workshop students will give a 15 minute presentation to the Partner and course academics on their project deliverables followed by a 10 minutes Q&A.

The presentation will include:

- project overview (e.g. context, rationale, aims, scope)
- findings, recommendations, and value proposition
- risks, limitations, and next steps
- any other relevant issues

Students will receive a team mark out of 5 for the overall synthesis and quality of their team presentation with an additional mark out of 10 for their individual presentation (15% weighing in total).

You will find additional information on this assessment task and the marking rubric in the assessment materials on Teams. Students will receive feedback before completing Assessment Task Three and Four.

Assessment 3: Project Deliverable and Slide-deck Report 40% (30% team mark + 10% peer assessment individual mark)

Due 9pm, Thursday of Week 4

This is a team assessment task.

The Deliverable/Product should be presented in way that can be easily delivered directly to the Partner.

The Slide-deck Report is also delivered to the Partner. It is a digital, stand-alone presentation that is meant to be read and not presented by the sender. A slide deck contains more text and fewer images than a typical presentation but less text and more images than a written report. The Slide-deck Report should cover:

- Project Overview: context, rationale, aims, scope
- Summary of research/process
- Evidence based justification for your findings, recommendations and value proposition

- Any other information the partner needs to know

Students will receive a team mark out of 30 with an additional peer assessment mark out of 10 for their individual contribution (40% weighing in total). Peer review and how to peer assess will be covered during the Week 1 workshops.

You will find additional information on this assessment task and the marking rubric in the assessment materials on Teams. Students will receive feedback within two weeks of submission.

Assessment 4: Individual Final Reflection 30%

Due 12pm (midday), Saturday week 4

To complete this individual task, students will have a choice between one of the following two options:

1. Critical Incident and Moment of Learning Task – students will choose an important incident or learning moment that occurred during their project work and reflect on what, and how, they learnt from this experience.
2. Reflection about Professional and Personal learning – students will write a structured report on their personal and professional development throughout the course including: personal and professional strengths and limitations, and what is required in the future to improve these capabilities.

Students will learn how to approach these assessment tasks during workshops. You will also find additional information on these different tasks and the marking in the assessment materials on Teams.

Grading Basis

Standard

Requirements to pass course

In order to pass this course, you must achieve an overall mark of at least 50%. Students must attend all classes or provide medical exemptions.

Course Schedule

Attendance Requirements

Please note that lecture recordings are not available for this course. Students are strongly encouraged to attend all classes and contact the Course Authority to make alternative arrangements for classes missed.

General Schedule Information

Workload: It is expected that students will complete 150 hours including:

- Project-related work (in and out of workshop hours)
- Readings and class preparation
- Assessment
- Follow-up activities as required

Course Resources

Recommended Resources

Assignment Submission Procedure

Online submission

All individual written assessments must be submitted electronically either on Teams or via Turnitin on Moodle. Individual assignments submitted electronically via Turnitin do not require cover sheets.

Ensure that your student ID number is in the top right-hand corner of each page for individual assignments and the team number plus student ID of all members is in the top right-hand corner of group assessments. Full information about how to prepare assignments for electronic submission can be found in the Turnitin Student Guide: <https://student.unsw.edu.au/turnitin>.

In the unlikely event that a problem should occur when submitting assignments online, students should send their assignment to their tutor and lecturer in charge before the deadline and re-submit using Turnitin as soon as the problem is rectified.

Referencing style

Harvard Referencing is required for all your assessments. During online course orientation activities, a module on referencing will provide the opportunity to review academic integrity

principles and how to reference correctly.

For the *ASB Harvard Referencing Guide*, see the [ASB Referencing and Plagiarism](#) webpage (ASB >Learning and Teaching>Student services> Referencing and plagiarism).

There is software available to you to make referencing easier:

1. Word has a built in referencing tool (<https://support.office.com/en-us/article/Create-a->)
2. As a UNSW student you also have free access to using and downloading Endnote on your computers: <https://www.myit.unsw.edu.au/software-students>

Word length

Word limits provide a guide so that you understand the expectations of your lecturers and tutors. Thus, the word limit plus or minus 10% of that limit is acceptable. If you submit a task that is too long, the marker will cease reading the submission once the word limit + 10% has been reached. So, for example if your word limit is 1000 words, the marker will cease reading at 1100 words.

Plagiarism

Students need to familiarise themselves with appropriate referencing standards as well as what constitutes plagiarism. If you are unsure, help is available here: <https://student.unsw.edu.au/plagiarism>. If you would like further assistance look at the '[with Academic Integrity](#)' online module.

Instances of plagiarism will be referred for review and educative action as appropriate. Marks will be deducted for inappropriate referencing.

Formatting requirements

Times New Roman, 12pt font and 1.5 line spacing is recommended.

Feedback

Feedback on student performance from formative and summative assessment tasks will be provided to students in a timely manner. Assessment tasks completed within the teaching period of a course, other than a final assessment, will be assessed and students provided with feedback, with or without a provisional result, within 10 working days of submission, under normal circumstances.

Special Consideration, Late Submission and Penalties

Late submission will incur a penalty of 5% per day or part thereof (including weekends) from the due date and time. An assessment will not be accepted after five days (120 hours) of the original deadline unless Special Consideration has been approved. An assignment is considered late if the requested format, such as hard copy or electronic copy, has not been submitted on time or where the 'wrong' assignment has been submitted.

Extensions to assessment deadlines will be granted only in exceptional circumstances, and where adequate supporting documentation can be provided. Please note that work commitments **do not** constitute grounds for an extension. Requests must be made through the special consideration process. For details about this process, see: <https://student.unsw.edu.au/special->

Course Evaluation and Development

Each session feedback is sought from students and other stakeholders about this course and continual improvements are made based on this feedback. In this course, we will seek your feedback through end of session MyExperience responses. Your feedback is important to ensure the course is continually improved.
