

## UNSW Course Outline

# PTRL6032 Coal Seam Gas Engineering - 2024

Published on the 07 Feb 2024

## General Course Information

Course Code : PTRL6032

Year : 2024

Term : Term 1

Teaching Period : T1

Is a multi-term course? : No

Faculty : Faculty of Engineering

Academic Unit : School of Minerals & Energy Resources Engineering

Delivery Mode : Online

Delivery Format : Standard

Delivery Location : Distance Education

Campus : Sydney

Study Level : Postgraduate

Units of Credit : 6

### Useful Links

[Handbook Class Timetable](#)

## Course Details & Outcomes

### Course Description

- Introduction to coal seam gas (CSG), resources, coal petrology.
- Theory of adsorption, LangMuir theorem, isotherm construction, CBM reservoir analysis-reserve estimates.

- Depth effects on permeability, Klinkenberg, Shrinkage, and Stress Effects on Permeability.
- CBM reservoir simulation and reserve estimation.
- Water Composition as Permeability Indicator, Relative Permeability, Butt and Cleat Permeabilities.
- Decline curve analysis.
- Drilling, Completion and stimulation (Hydraulic fracturing).
- Production operations.
- Economics of CBM recovery.
- CBM Legislation.

## Course Aims

To Provide insight on Coal seam gas production and its related technology

## Course Learning Outcomes

| Course Learning Outcomes   |
|--|
| CL01 : Understanding of Coal seam gas related technologies and its implementation. |

| Course Learning Outcomes   | Assessment Item   |
|--|---|
| CL01 : Understanding of Coal seam gas related technologies and its implementation. | <ul style="list-style-type: none"> <li>• Assignments</li> <li>• Weekly Discussions</li> <li>• Final exam</li> </ul> |

## Learning and Teaching Technologies

Moodle - Learning Management System

## Additional Course Information

This is fully online course part of the PTRL Open Learning Program

## Assessments

### Assessment Structure

| Assessment Item    | Weight | Relevant Dates |
|--------------------|--------|----------------|
| Assignments        | 30%    |                |
| Weekly Discussions | 10%    |                |
| Final exam         | 60%    |                |

# Assessment Details

## Assignments

### Assessment Overview

Several assignments on different sections of the course

### Course Learning Outcomes

- CL01 : Understanding of Coal seam gas related technologies and its implementation.

### Detailed Assessment Description

Assignment 1 is due on 8/March/2024 (10%)

Assignment 2 is due on 5/April/2024 (10%)

Assignment 3 is due on 19/April/2024 (10%)

## Weekly Discussions

### Assessment Overview

Weekly online discussions on topics covered that week

### Course Learning Outcomes

- CL01 : Understanding of Coal seam gas related technologies and its implementation.

### Detailed Assessment Description

Weekly online discussions on topics covered that week, starting from week 2. Students should submit their responses by the end of each week.

## Final exam

### Assessment Overview

Final exam

### Course Learning Outcomes

- CL01 : Understanding of Coal seam gas related technologies and its implementation.

### Detailed Assessment Description

Final exam covering all content of the course.

# General Assessment Information

## Grading Basis

Standard

## Course Schedule

### Attendance Requirements

Not Applicable - as no class attendance is required

## Course Resources

### Prescribed Resources

Fundamentals of Coalbed Methane Reservoir Engineering by John Seidle

<https://primoa.library.unsw.edu.au/permalink/f/11jha62/>

TNcdiproquestebookcentralEBC3385317

### Recommended Resources

## Staff Details

| Position     | Name               | Email | Location               | Phone     | Availability | Equitable Learning Services Contact | Primary Contact |
|--------------|--------------------|-------|------------------------|-----------|--------------|-------------------------------------|-----------------|
| Convenor     | Peyman Most aghimi |       | UNSW Kensington Campus | 293855122 |              | No                                  | Yes             |
| Demonstrator | Wen Xi             |       | UNSW Kensington Campus |           |              | No                                  | No              |

## Other Useful Information

### Academic Information

#### I. Special consideration and supplementary assessment

If you have experienced an illness or misadventure beyond your control that will interfere with your assessment performance, you are eligible to apply for Special Consideration prior to, or within 3 working days of, submitting an assessment or sitting an exam.

Please note that UNSW has a Fit to Sit rule, which means that if you sit an exam, you are declaring yourself fit enough to do so and cannot later apply for Special Consideration.

For details of applying for Special Consideration and conditions for the award of supplementary assessment, please see the information on UNSW's [Special Consideration page](#).

## **II. Administrative matters and links**

All students are expected to read and be familiar with UNSW guidelines and policies. In particular, students should be familiar with the following:

- [Attendance](#)
- [UNSW Email Address](#)
- [Special Consideration](#)
- [Exams](#)
- [Approved Calculators](#)
- [Academic Honesty and Plagiarism](#)
- [Equitable Learning Services](#)

## **III. Equity and diversity**

Those students who have a disability that requires some adjustment in their teaching or learning environment are encouraged to discuss their study needs with the course convener prior to, or at the commencement of, their course, or with the Equity Officer (Disability) in the Equitable Learning Services. Issues to be discussed may include access to materials, signers or note-takers, the provision of services and additional exam and assessment arrangements. Early notification is essential to enable any necessary adjustments to be made.

## **IV. Professional Outcomes and Program Design**

Students are able to review the relevant professional outcomes and program designs for their streams by going to the following link: <https://www.unsw.edu.au/engineering/student-life/student-resources/program-design>.

*Note: This course outline sets out the description of classes at the date the Course Outline is published. The nature of classes may change during the Term after the Course Outline is published.*

*Moodle or your primary learning management system (LMS) should be consulted for the up-to-date class descriptions. If there is any inconsistency in the description of activities between the University timetable and the Course Outline/Moodle/LMS, the description in the Course Outline/Moodle/LMS applies.*

## **Academic Honesty and Plagiarism**

UNSW has an ongoing commitment to fostering a culture of learning informed by academic integrity. All UNSW students have a responsibility to adhere to this principle of academic integrity. Plagiarism undermines academic integrity and is not tolerated at UNSW. *Plagiarism at UNSW is defined as using the words or ideas of others and passing them off as your own.*

Plagiarism is a type of intellectual theft. It can take many forms, from deliberate cheating to accidentally copying from a source without acknowledgement. UNSW has produced a website with a wealth of resources to support students to understand and avoid plagiarism, visit: [student.unsw.edu.au/plagiarism](http://student.unsw.edu.au/plagiarism). The Learning Centre assists students with understanding academic integrity and how not to plagiarise. They also hold workshops and can help students one-on-one.

You are also reminded that careful time management is an important part of study and one of the identified causes of plagiarism is poor time management. Students should allow sufficient time for research, drafting and the proper referencing of sources in preparing all assessment tasks.

Repeated plagiarism (even in first year), plagiarism after first year, or serious instances, may also be investigated under the Student Misconduct Procedures. The penalties under the procedures can include a reduction in marks, failing a course or for the most serious matters (like plagiarism in an honours thesis or contract cheating) even suspension from the university. The Student Misconduct Procedures are available here:

[www.gs.unsw.edu.au/policy/documents/studentmisconductprocedures.pdf](http://www.gs.unsw.edu.au/policy/documents/studentmisconductprocedures.pdf)

## **Submission of Assessment Tasks**

Work submitted late without an approved extension by the course coordinator or delegated authority is subject to a late penalty of five percent (5%) of the maximum mark possible for that assessment item, per calendar day.

The late penalty is applied per calendar day (including weekends and public holidays) that the assessment is overdue. There is no pro-rata of the late penalty for submissions made part way through a day. This is for all assessments where a penalty applies.

Work submitted after five days (120 hours) will not be accepted and a mark of zero will be awarded for that assessment item.

For some assessment items, a late penalty may not be appropriate. These will be clearly indicated in the course outline, and such assessments will receive a mark of zero if not completed by the specified date. Examples include:

- Weekly online tests or laboratory work worth a small proportion of the subject mark;
- Exams, peer feedback and team evaluation surveys;
- Online quizzes where answers are released to students on completion;
- Professional assessment tasks, where the intention is to create an authentic assessment that has an absolute submission date; and,
- Pass/Fail assessment tasks.

## **Faculty-specific Information**

[Engineering Student Support Services](#) – The Nucleus - enrolment, progression checks, clash requests, course issues or program-related queries

[Engineering Industrial Training](#) – Industrial training questions

[UNSW Study Abroad](#) – study abroad student enquiries (for inbound students)

[UNSW Exchange](#) – student exchange enquiries (for inbound students)

[UNSW Future Students](#) – potential student enquiries e.g. admissions, fees, programs, credit transfer

## **Phone**

(+61 2) 9385 8500 – Nucleus Student Hub

(+61 2) 9385 7661 – Engineering Industrial Training

(+61 2) 9385 3179 – UNSW Study Abroad and UNSW Exchange (for inbound students)

## School-specific Information

### Course completion

Course completion requires submission of all assessment items. Failure to submit all assessment items may result in the award of an Unsatisfactory Failure (UF) grade for the Course unless special consideration has been submitted and approved.

### Submission of Assessment Tasks

We encourage you to retain a copy of every assignment submitted for your own record, either in hardcopy or electronic form. All assessments must have an assessment cover sheet attached.

### Student Resources

The School has [student resources](#) section, containing useful advice and information to ensure you're able to focus on your studies.

### Computing Resources and Internet Access Requirements

UNSW Minerals and Energy Resources Engineering provides blended learning using the online Moodle LMS (Learning Management System). Also see - Transitioning to Online Learning: [www.covid19studyonline.unsw.edu.au](http://www.covid19studyonline.unsw.edu.au)

Note that some specialist engineering software is not available for Mac computers.

- Mining Engineering Students: OMB G48
- Petroleum Engineering Students: TETB LG34 & LG35

For more information about system requirements is available at [www.student.unsw.edu.au/moodle-system-requirements](http://www.student.unsw.edu.au/moodle-system-requirements)

### Accessing Course Materials Through Moodle

Course outlines, support materials are uploaded to Moodle, the university standard Learning Management System (LMS). In addition, on-line assignment submissions are made using the assignment dropbox facility provided in Moodle. All enrolled students are automatically included in Moodle for each course. To access these documents and other course resources, please visit: [www.moodle.telt.unsw.edu.au](http://www.moodle.telt.unsw.edu.au)

## School Contact Information

School of Minerals and Energy Resources  
Old Main Building, Level 1, 159 (K15)  
UNSW SYDNEY NSW 2052 AUSTRALIA

For current students, all enquiries and assistance relating to enrolment, class registration, progression checks and other administrative matters, please see [The Nucleus: Student Hub](#).
