

UNSW Course Outline

PSYC5112 Introduction to Psychology - 2024

Published on the 03 Mar 2024

General Course Information

Course Code : PSYC5112

Year : 2024

Term : Hexamester 2

Teaching Period : KF

Is a multi-term course? : No

Faculty : Faculty of Science

Academic Unit : School of Psychology

Delivery Mode : Online

Delivery Format : Standard

Delivery Location : Distance Education

Campus : Sydney

Study Level : Postgraduate

Units of Credit : 6

Course Details & Outcomes

Course Description

This course forms part of the Graduate Certificate in Child Development (7419). It introduces the principles and methods of psychology as a basic science, with specific reference to fundamental topics that will prove relevant to the study of child development. Students will explore the social

and biological bases of behaviour in introductory topics including: Human Development, Attention and Memory, Learning and Cognition, Personality and Social Psychology, Abnormal Psychology, and Health Psychology. In addition, students will be trained in the methods of psychological inquiry and the critical evaluation of research. This course is appropriate for students with and without a background in science and is taught entirely online, using a variety of lectures, tutorials (synchronous and asynchronous options), self-paced learning modules, readings and revision exercises.

Course Aims

This course aims to provide students with introductory knowledge about fundamental topics within psychology that are relevant to the study of child development. These include: human development, attention and memory, learning and cognition, personality, social influences on behaviour, abnormal psychology, and health psychology. This course aims to introduce students to the research and theories pertaining to core psychological constructs within each of these topics, as well as to the basic principles underpinning the scientific method, providing the foundation for critical thinking and sceptical inquiry.

Relationship to Other Courses

This course forms part of the Graduate Certificate in Child Development program & is an introductory course required as a pre-requisite before taking intermediate & advanced courses.

Course Learning Outcomes

Course Learning Outcomes
CLO1 : Identify and describe a diverse range of fundamental psychological constructs, including normal and abnormal psychological development, mechanisms of attention, memory, learning, and cognition, social influences on behaviour, and the psychology of health.
CLO2 : Apply foundational academic literacy skills in conducting a literature search for peer-reviewed papers, summarising relevant literature, and employing appropriate citation and referencing conventions.
CLO3 : Evaluate competing theoretical and empirical perspectives and effectively select and apply relevant information to support psychological arguments.
CLO4 : Review and discuss evidence-based practice and professional ethics in psychology.
CLO5 : Communicate scientific information and arguments effectively in written formats.
CLO6 : Incorporate diverse perspectives and employ a culturally sensitive approach to discussions of psychological constructs, research, and practice.

Learning and Teaching Technologies

Moodle - Learning Management System | Blackboard Collaborate

Learning and Teaching in this course

This is a fully online course; all materials, lectures and tutorials are delivered through Moodle.

The course will be delivered over six weeks, covering six major topic areas. The major topics will be delivered in Weeks 1 to 6, with a new topic presented each week. Students are expected to engage with all materials delivered each week. There will be a combination of formative and summative assessments throughout the course. The expected level of engagement is 18-19 hours per week, including preparation for the “secured” quizzes and written assessments.

Each week students can expect the following:

Lectures will be digitally recorded. Links to the lecture recordings will be available on the course

web page. Lecture slides will be also available on the Moodle course page. There will be 6 x 20-minute lectures covering the main concepts for each topic presented each week.

Online Tutorials will be held in weeks 1-6. There are six (6), two (2) hour tutorials delivered through Blackboard Collaborate on the Moodle course page each week. All tutorials will be live streamed for synchronous participation and recorded for asynchronous participation, should a student be unable to join the synchronous tutorial at the designated time. Students will be able access the recorded tutorials for the remainder of the course. Tutorial discussions are based on lecture content and readings. In order to participate in class discussions, you will need to prepare for tutorials by reviewing the available materials.

Online activities: Each week there will be a range of online activities, including revision quizzes and interactive learning modules using a range of adaptive learning platforms (e.g. H5P, textbook resources). These activities will allow students to explore the topics of the week in greater depth and engage informative assessment and revision opportunities.

The formative topic revision quizzes available for students provide an opportunity to evaluate understanding of course material on a weekly basis. Timely completion of the weekly quizzes will assist students in gaining a clear understanding of each topic so that this knowledge can be built on in future content. **NB: These formative quizzes do not contribute to the student's final grade and are not to be confused with the "secured weekly quizzes".**

Readings: Each week there will be assigned readings that cover the major topic of the week. Students will need to complete the readings in order to prepare for the online tutorials. In addition, as part of this preparation students are encouraged to post one comment/discussion point on the Discussion Forum and reply to the comment of at least two other students in the course (**4.5 hours**).

The Discussion Forum connects students in the course and provides a platform for students to discuss of weekly content, revision, or topics of interest with each other. Regular engagement in the Discussion Forum will help students gain an understanding of the material, critique the contributions of fellow students, and help develop written communication skills.

The Q and A Discussion Forum provides students with an opportunity to question and clarify the concepts and ideas mentioned in the lectures. Students are strongly encouraged to engage with this forum by posting questions or comments, and reading, answering, or replying to other students' posts to enhance understanding of the content, critical thinking, and written

communication skills.

Additional Course Information

The [Program Guide](#) contains School policies and procedures relevant for all students enrolled in the Graduate Certificate in Child Development, such as:

- Attendance requirements
- Assignment submissions and returns
- Assessments
- Special consideration
- Student code of conduct
- Student complaints and grievances
- Equitable Learning Services
- Health and safety

It is expected that students familiarise themselves with the information contained in this guide.

The course Moodle page contains lectures, tutorials, content topic materials, assessment materials, and any updated information. You are expected to check Moodle regularly. You are also expected to regularly check your UNSW email. All news and announcements will be made on the “Announcements” forum on the Moodle page and/or by email. It is the student’s responsibility to check Moodle and their student emails regularly to keep up to date.

Given that the course content and all assessable components are delivered online, it is the responsibility of the student to ensure that they have access to a computer with a stable internet connection and a browser capable of handling the features of the Moodle eLearning website and any of its content. There will be no special consideration granted due to internet connection or computer issues arising from personal technical issues. If an internet disconnection takes place during an assessment/exam, there will be no way of changing a mark and these will be allocated according to the progress that was saved. To help students establish whether their computer/internet access is suitable for the online exam/s, a test quiz is available. This quiz will not contribute to final marks and will be able to be completed multiple times in order to test computer/internet connection prior to assessments/exams.

The Moodle forum should be the first line of contact with the Course Convenor (meeting requests, personal or Equitable Learning Support matters can be sent by email in the first instance). Due to the online nature of the course, under no circumstances are specific exam/quiz questions/answers to be discussed in online forums or via email. Such matters can only be discussed during in person virtual appointments with the Course Convenor.

NOTE: THIS COURSE REQUIRES SIGNIFICANT WEEKLY ASSESSABLE ENGAGEMENT THROUGH MOODLE. Students are expected to engage with all materials delivered each week. There will be a combination of formative and summative assessments throughout the course. The expected level of engagement is on average 18-19 hours per week (in the 6-week term). Average engagement levels are as follows: (a) 2 hours of engagement with the lecture content (6 x 20-minute lectures per week); (b) Tutorial attendance, 3 hours per week including preparation for the tutorial discussion. Note we recommend that you complete the synchronous tutorial, however completion of the recorded asynchronous tutorial will also be accepted; (c) 4.5 hours to complete the assigned activities, including revision modules; (d) 4.5 hours to complete the assigned weekly readings that accompany the content for each lecture topic; (e) 4-5 hours to complete the weekly assessments (secured quizzes) and prepare for the major assessments.

Under no circumstances will employment be accepted as an excuse not to meet expectations for class participation or assessments. Remember, the term times are very short, so it is your responsibility to ensure that you do not fall behind with the ongoing assessment demands of the course.

Tutorial Attendance: Attendance and participation in tutorials is compulsory. All tutorials will be delivered in an online mode, through Blackboard Collaborate. Given that this is a fully online course, it is understood that some students may be unavailable at the designated live tutorial time. Therefore, students will be required to participate in the tutorial in either a synchronous (as the tutorial is streamed live) or asynchronous (via a recorded version of the tutorial) format.

NB: Engagement with online tutorials and timely completion of asynchronous online tutorials is essential in accordance with UNSW Assessment Implementation Procedure.

It is expected that students are aware of UNSW Assessment policy and understand how to apply for special consideration within the framework of the Graduate Certificate special consideration policies and procedures if they are unable to complete an assignment/exam due to illness and/or misadventure.

Assessments

Assessment Structure

Assessment Item	Weight	Relevant Dates
Information Literacy Skills Portfolio Assessment Format: Individual	20%	Due Date: Sunday Week 2
Literature Review Assessment Format: Individual	30%	Due Date: Sunday Week 5
Weekly Quizzes Assessment Format: Individual	50%	Due Date: Sunday each week

Assessment Details

Information Literacy Skills Portfolio

Assessment Overview

You will be required to complete a comprehensive literature search using a range of databases in order to find 3 peer-reviewed journal articles about one of the major topics presented in the course. You will then answer a series of short-answer questions designed to demonstrate knowledge of appropriate academic referencing. Evidence of the database search, the articles, and the answers to the questions will be submitted in an e-portfolio at the end of Week 2. This assessment will provide you with the opportunity to demonstrate research and critical analysis skills. Feedback will be provided in the form of marks and written comments.

Course Learning Outcomes

- CLO2 : Apply foundational academic literacy skills in conducting a literature search for peer-reviewed papers, summarising relevant literature, and employing appropriate citation and referencing conventions.
- CLO3 : Evaluate competing theoretical and empirical perspectives and effectively select and apply relevant information to support psychological arguments.
- CLO5 : Communicate scientific information and arguments effectively in written formats.
- CLO6 : Incorporate diverse perspectives and employ a culturally sensitive approach to discussions of psychological constructs, research, and practice.

Assessment Length

750 words

Assignment submission Turnitin type

This assignment is submitted through Turnitin and students do not see Turnitin similarity reports.

Literature Review

Assessment Overview

You will be required to complete a literature review (approximately 1500 words) based on one of the concepts discussed in lectures/tutorials. The literature will provide you with the opportunity to develop skills in evaluating research and in clear and concise communication, which is important for scientific writing. The review should include a critical evaluation of the current research and theory pertaining to the topic, and incorporate the values and ethics of psychology. You will be assessed on the strength of the argument you present. Reviews will be due at the end of Week 5, with feedback provided in the form of marks and written comments.

Course Learning Outcomes

- CLO2 : Apply foundational academic literacy skills in conducting a literature search for peer-reviewed papers, summarising relevant literature, and employing appropriate citation and referencing conventions.
- CLO3 : Evaluate competing theoretical and empirical perspectives and effectively select and apply relevant information to support psychological arguments.
- CLO4 : Review and discuss evidence-based practice and professional ethics in psychology.
- CLO5 : Communicate scientific information and arguments effectively in written formats.
- CLO6 : Incorporate diverse perspectives and employ a culturally sensitive approach to discussions of psychological constructs, research, and practice.

Assessment Length

1500 words

Assignment submission Turnitin type

This assignment is submitted through Turnitin and students do not see Turnitin similarity reports.

Weekly Quizzes

Assessment Overview

You will be required to complete 6 timed quizzes designed to be taken as closed-book exams. These quizzes will cover the content of the lectures and readings. The quizzes will be held in weeks 1-6 and will cover content presented in the week they are released. The quizzes form part of a cumulative assessment; of the 6 quizzes completed, the best 5 scores will contribute towards the 50% total weighting (10% each quiz). Each quiz will comprise 20 multiple choice questions. You will receive automated online feedback in the form of marks and question answers once each quiz is closed.

Course Learning Outcomes

- CLO1 : Identify and describe a diverse range of fundamental psychological constructs, including normal and abnormal psychological development, mechanisms of attention, memory, learning, and cognition, social influences on behaviour, and the psychology of health.
- CLO3 : Evaluate competing theoretical and empirical perspectives and effectively select and apply relevant information to support psychological arguments.
- CLO4 : Review and discuss evidence-based practice and professional ethics in psychology.

Assessment Length

20 MCQ; 20 min

Assignment submission Turnitin type

Not Applicable

General Assessment Information

Special Consideration: Students who experience circumstances outside of their control that prevent them from completing an assessment task by the assigned due date can apply for Special Consideration. Special Consideration applications should include a medical certificate or other documentation and be submitted via myUNSW within 3 days of the sitting/due date.

Important note: UNSW has a “fit to sit/submit” rule, which means that if you sit an exam or submit a piece of assessment, you are declaring yourself fit to do so and cannot later apply for Special Consideration. This is to ensure that if you feel unwell or are faced with significant circumstances beyond your control that affect your ability to study, you do not sit an examination or submit an assessment that does not reflect your best performance. Instead, you should apply for Special Consideration as soon as you realise you are not well enough or are otherwise unable to sit or submit an assessment.

Once your application has been assessed, you will be contacted via your student email address and advised of the official outcome. If the special consideration application is approved, you may be given an extended due date. For more information about special consideration, please visit: <https://student.unsw.edu.au/special-consideration>.

Alternative assessments: there will be no alternative assessments due to the intensive nature of the course. Please refer to the Graduate Certificate in Child Development (7419) Program Guide for policies and procedures relating to misadventure.

Supplementary examinations: Students may apply for a supplementary exam, providing that this

is not an ongoing issue. If students are unable to engage in all aspects of the course for two weeks or longer, the student will be required to submit an application to withdraw from the course without penalty. Please refer to the Graduate Certificate in Child Development (7419) Program Guide for policies and procedures relating to misadventure.

All course assessments have been designed and implemented in accordance with [UNSW Assessment Policy](#).

The APA (7th edition) referencing style is to be adopted in this course. Students should consult the publication manual itself (rather than third party interpretations of it) in order to properly adhere to APA style conventions. Students do not need to purchase a copy of the manual, it is available in the library or online. This resource is used by assessment markers and should be the only resource used by students to ensure they adopt this style appropriately: [APA 7th edition](#).

Grading Basis

Standard

Requirements to pass course

Students must attain a final grade of at least 50/100 to pass this course.

Course Schedule

Teaching Week/Module	Activity Type	Content
Week 1 : 11 March - 17 March	Lecture	Topic: Human development
	Tutorial	Online discussion of W1 content
	Other	Weekly Readings Weekly activities/formative quiz
	Assessment	Week 1 Quiz: Due 11:59pm Sunday Work on Assessment 1: ILS Portfolio
Week 2 : 18 March - 24 March	Lecture	Topic: Attention and Memory
	Tutorial	Online discussion of W2 content
	Other	Weekly Readings Weekly activities/formative quiz
	Assessment	Week 2 Quiz: Due 11:59pm Sunday Assessment 1 ILS Portfolio: Due 11:59pm Sunday
Week 3 : 25 March - 31 March	Lecture	Topic: Learning and Cognition
	Tutorial	Online discussion of W3 content
	Other	Weekly Readings Weekly activities/formative quiz
	Assessment	Week 3 Quiz: Due 11:59pm Sunday Work on Assessment 2: Literature Review
Week 4 : 1 April - 7 April	Lecture	Topic: Personality and Social Psychology
	Tutorial	Online discussion of W4 content
	Other	Weekly Readings Weekly activities/formative quiz
	Assessment	Week 4 Quiz: Due 11:59pm Sunday Work on Assessment 2: Literature Review
Week 5 : 8 April - 14 April	Lecture	Topic: Abnormal Psychology
	Tutorial	Online discussion of W5 content
	Other	Weekly Readings Weekly activities/formative quiz
	Assessment	Week 5 Quiz: Due 11:59pm Sunday Assessment 2 Literature Review: Due 11:59pm Sunday
Week 6 : 15 April - 21 April	Lecture	Topic: Health Psychology
	Tutorial	Online discussion of W6 content
	Other	Weekly Readings Weekly activities/formative quiz
	Assessment	Week 6 Quiz: Due 11:59pm Sunday

Attendance Requirements

Students are strongly encouraged to attend all classes and review lecture recordings.

General Schedule Information

Each week this course typically consists of 2 hours of online lecture material, 2 hours of online tutorial classes (synchronous and asynchronous options), and 1-2 hours of online activities.

Students are expected to spend additional time each week to complete self-determined study, and work on assessments, readings, and exam preparation.

Course Resources

Prescribed Resources

There is no prescribed textbook for this course. There are optional, supplementary readings and activities relating to each set of lectures and tutorials that will be made available on Moodle.
