UNSW Course Outline

PHCM9626 Inequalities, Inequities and Health - 2024

Published on the 13 May 2024

General Course Information

Course Code : PHCM9626

Year : 2024

Term : Term 2

Teaching Period : T2

Is a multi-term course? : No

Faculty : Faculty of Medicine and Health

Academic Unit : School of Population Health

Delivery Mode : Multimodal

Delivery Format : Standard

Delivery Location : Kensington

Campus : Sydney

Study Level : Postgraduate

Units of Credit : 6

[Handbook Class Timetable](#)

Course Details & Outcomes

Course Description

There has been increasing evidence to support the argument that differences in health and opportunities for good health are strongly determined by inequities in social and structural factors in society. The aim of this course is to introduce you to major concepts and evidence of

practice necessary to understand and reduce or prevent health inequalities in western industrialised countries. Specific topics explored include the patterns of health **inequalities and inequities** in populations, political and **structural determinants of inequities**, and actions to **reduce or eliminate** health inequities presented through case studies of effective interventions.

Course Aims

The aims of this course are to develop your understanding of inequalities and inequities in health, to recognise and discuss the determinants of inequalities and inequities in health and to examine actions to reduce or eliminate inequities in health.

Relationship to Other Courses

This course is an elective in the Master of Public Health and Master of Health Leadership and Management, comprising 6 units of credit towards the total required for completion of the study program. There are no pre-requisites for this course. The course builds on and integrate knowledge that students have developed in core subjects such as Foundations of Epidemiology, Health Promotion & Social Perspectives of Health, and elective subjects such as Community Development.

Assistance with progression checking:

If you are unsure how this course fits within your program, you can seek guidance on optimising your program structure from staff at the [Nucleus Student Hub](#).

Progression plans for UNSW Medicine and Health programs can be found on the [UNSW Medicine & Health website](#).

Course Learning Outcomes

Course Learning Outcomes
CLO1 : Define and discuss key concepts of equality and equity, inequality and inequity, and describe common patterns of health inequality and inequity in populations, and discuss ways that inequalities and inequities in health are measured.
CLO2 : Identify and describe a commonly used theoretical framework that explains determinants of health inequalities and apply these explanations and analyse health inequalities in populations using this framework.
CLO3 : Examine and critique common approaches to reducing or eliminating inequities in the health of populations using evidence and examples.
CLO4 : Distinguish between actions that have been taken to reduce inequity, actions that have been taken to reduce health harms associated with inequity, and actions that have been taken to prevent health inequity from arising in the future.
CLO5 : Identify and describe the distribution of determinants of inequalities in health and apply these understandings to the planning and implementation of actions to reduce inequity or to influence its determinants.

Course Learning Outcomes	Assessment Item

Learning and Teaching Technologies

Moodle - Learning Management System | Microsoft Teams

Learning and Teaching in this course

The learning and teaching philosophy underpinning this course is centred on student learning and aims to create a safe, equitable, supportive and inclusive environment which interests and challenges students. The teaching is designed to be engaging and relevant in order to prepare students for future careers.

We also aim to bring a decolonising approach to teaching and learning by drawing attention to where, when and how knowledge is produced, and by whom. Identifying and challenging hierarchies of knowledge and perspectives associated with racism and colonialism is an important aspect of the course. Our teaching also aims to empower students as future public health professionals to reflect on the contributions they and their organisations can make to reducing inequities in health (to changing policies, practices or environments for example).

All course materials and course announcements are provided on the course learning management system, Moodle.

Microsoft Teams will be used for online lectures, tutorials and lecture recordings. Details of this will be communicated via Moodle (or Open Access).

By accessing and using the ICT resources provided by UNSW, you are agreeing to abide by the 'Acceptable Use of UNSW ICT Resources' policy particularly on respect for intellectual property and copyright, legal and ethical use of ICT resources and security and privacy.

Assessments

Assessment Structure

Assessment Item	Weight	Relevant Dates
Assignment Assessment Format: Individual Short Extension: Yes (7 days)	35%	Start Date: Not Applicable Due Date: Week 5: 24 June - 30 June
Online discussion forum Assessment Format: Individual Short Extension: Yes (2 days)	20%	Start Date: Discussion Forums open one week prior to due date Due Date: Wednesdays 12PM - Week 2, 4 and 8
Assignment Assessment Format: Individual Short Extension: Yes (7 days)	45%	Start Date: Not Applicable Due Date: Week 10: 29 July - 04 August

Assessment Details

Assignment

Assessment Overview

This is an individual assessment task due before census date. You will be expected to critically engage with examples of health inequalities and discuss patterns of inequities and their causes. You will need to draw on your conceptual understanding from the course and use literature to support your response.

Individual feedback is provided within 10 working days.

Course Learning Outcomes

- CLO1 : Define and discuss key concepts of equality and equity, inequality and inequity, and describe common patterns of health inequality and inequity in populations, and discuss ways that inequalities and inequities in health are measured.
- CLO2 : Identify and describe a commonly used theoretical framework that explains determinants of health inequalities and apply these explanations and analyse health inequalities in populations using this framework.
- CLO3 : Examine and critique common approaches to reducing or eliminating inequities in the health of populations using evidence and examples.

Detailed Assessment Description

Detailed information about this assessment will be provided on the course Moodle page

Assessment Length

1500

Submission notes

This task has a short extension option. A short extension of up to 7 days is available for this task. See 3. Submission of Assessment Tasks in the Other Useful Information tab of your course outline and refer to Moodle for additional information

Assessment information

Use of Generative Artificial Intelligence (AI) in the assessment

UNSW Pro-Vice Chancellor Education and Student Experience (PVCESE) provides guidance on the [use of generative Artificial Intelligence in assessments](#).

- **SIMPLE EDITING ASSISTANCE**

.For this assessment task, you may use AI-based software to research and prepare prior to

writing your assessment. You are permitted to use standard editing and referencing functions in word processing software in the creation of your submission: this is limited to spelling and grammar checking and reference citation generation. You must not use any functions that generate or paraphrase or translate passages of text, whether based on your own work or not.

Please note that your submission will be passed through an AI-generated text detection tool. If your marker has concerns that your answer contains passages of AI-generated text you may be asked to explain your work. If you are unable to satisfactorily demonstrate your understanding of your submission you may be referred to UNSW Conduct & Integrity Office for investigation for academic misconduct and possible penalties.

Assignment submission Turnitin type

This assignment is submitted through Turnitin and students can see Turnitin similarity reports.

Online discussion forum

Assessment Overview

This is an individual assessment task requiring you to contribute to online discussion forums throughout the term. In this task, you will contribute to all discussion forums, engage with your peers' responses, and demonstrate critical thinking and your ability to make connections between different elements of the course.

A practice discussion forum will be organised before census date and collective formative feedback will be provided.

Individual feedback on all other forums is provided within 10 working days.

Course Learning Outcomes

- CLO1 : Define and discuss key concepts of equality and equity, inequality and inequity, and describe common patterns of health inequality and inequity in populations, and discuss ways that inequalities and inequities in health are measured.
- CLO2 : Identify and describe a commonly used theoretical framework that explains determinants of health inequalities and apply these explanations and analyse health inequalities in populations using this framework.
- CLO3 : Examine and critique common approaches to reducing or eliminating inequities in the health of populations using evidence and examples.
- CLO4 : Distinguish between actions that have been taken to reduce inequity, actions that have been taken to reduce health harms associated with inequity, and actions that have been taken to prevent health inequity from arising in the future.

Detailed Assessment Description

Detailed information about this assessment will be provided on the course Moodle page.

Submission notes

This task does have a short extension option. A short extension of up to 2 days is available for this task. See 3. Submission of Assessment Tasks in the Other Useful Information tab of your course outline and refer to Moodle for additional submission information. This task is submitted through the Moodle Forum page. This task has a short extension option of 2 days

Assessment information

Use of Generative Artificial Intelligence (AI) in the assessment

UNSW Pro-Vice Chancellor Education and Student Experience (PVCESE) provides guidance on the [use of generative Artificial Intelligence in assessments](#).

- **SIMPLE EDITING ASSISTANCE**

.For this assessment task, you may use AI-based software to **research and prepare prior to writing your assessment**. You are permitted to use standard editing and referencing functions in word processing software in the creation of your submission: this is limited to spelling and grammar checking and reference citation generation. You must not use any functions that generate or paraphrase or translate passages of text, whether based on your own work or not.

Please note that your submission will be passed through an AI-generated text detection tool. If your marker has concerns that your answer contains passages of AI-generated text you may be asked to explain your work. If you are unable to satisfactorily demonstrate your understanding of your submission you may be referred to UNSW Conduct & Integrity Office for investigation for academic misconduct and possible penalties.

Assignment submission Turnitin type

This is not a Turnitin assignment

Assignment

Assessment Overview

This is an individual assessment task due at the end of term. You will be expected to produce a structured report that addresses a health inequity you have identified and outline a planned intervention to address its causes and / or determinants.

Individual feedback is provided within 10 working days

Course Learning Outcomes

- CLO3 : Examine and critique common approaches to reducing or eliminating inequities in the health of populations using evidence and examples.
- CLO4 : Distinguish between actions that have been taken to reduce inequity, actions that have been taken to reduce health harms associated with inequity, and actions that have been taken to prevent health inequity from arising in the future.

Detailed Assessment Description

Detailed information about this assessment will be provided on the course Moodle page

Assessment Length

2500

Submission notes

This task does have a short extension option. A short extension of up to 7 days is available for this task. See 3. Submission of Assessment Tasks in the Other Useful Information tab of your course outline and refer to Moodle for additional submission information

Assessment information

Use of Generative Artificial Intelligence (AI) in the assessment

UNSW Pro-Vice Chancellor Education and Student Experience (PVCESE) provides guidance on the [use of generative Artificial Intelligence in assessments](#).

- **PLANNING ASSISTANCE**

As this assessment task involves some planning or creative processes, you are permitted to use software to generate **initial drafts, initial ideas and initial structures**. However, you **must develop or edit those ideas** to such a **significant extent** that what is submitted is your own work, i.e., what is generated by the software should not be a part of your final submission. You are required to submit AI generated responses as an appendix. It is also a good idea to keep copies of your initial drafts to show your lecturer if there is any uncertainty about the originality of your work.

Please note that your submission will be passed through an AI-text detection tool. If your marker has concerns that your answer contains passages of AI-generated text that have not been sufficiently modified you may be asked to explain your work, but we recognise that you are permitted to use AI generated text as a starting point and some traces may remain. If you are unable to satisfactorily demonstrate your understanding of your submission you may be referred to UNSW Conduct & Integrity Office for investigation for academic misconduct and possible

penalties.

Assignment submission Turnitin type

This assignment is submitted through Turnitin and students can see Turnitin similarity reports.

General Assessment Information

Detailed instructions regarding assessments for this course are provided on the course Moodle page.

For student information on results, grades, and guides to assessment see: <https://student.unsw.edu.au/assessment>

Adopting a critical approach to your assignments

It is important that you adopt a critical approach to the material that you source for assignments, to the required readings, and to other resources you are presented with during the course. Think about and evaluate the material which you are reading and which you are presenting in assignments. Attempt to cast aside your assumptions and biases and attempt to assess the logic and consistency of the material in light of the supporting evidence. Wide reading on a topic facilitates this.

Referencing

School of Population Health requires students to use either APA or Vancouver referencing styles for all assignments for this course. It is your responsibility to learn either APA or Vancouver referencing and use it consistently to acknowledge sources of information (citing references). Failure to reference correctly may limit marks to PS or below. Guidelines for acknowledging sources of information can be found on the following websites:

UNSW Library: <http://subjectguides.library.unsw.edu.au/elise>

- UNSW Academic Skills and Support: <https://student.unsw.edu.au/skills>

Word limits

All word limits are to be strictly adhered to (i.e. there is no 10% leeway). Word limits include all text (e.g. headings, title, main text) and exclude tables and figures, in-text citations (if you are using APA) and reference lists. Exceptions may apply. Please refer to your individual task description for exceptions.

Turnitin

All written assessment tasks in courses in the School of Population Health use Turnitin. Turnitin is a similarity and generative AI detection software that enables assignments to be checked against the submitted assignments of other students using Turnitin, as well as the internet. If you are unfamiliar with the Turnitin software, a demonstration can be found at:

<https://student.unsw.edu.au/turnitin>

Originality and Generative AI reports

In School of Population Health courses, access to the originality report of your submission through Turnitin is available to you. Students do not have access to the Generative AI report. In School of Population Health courses, you are permitted to resubmit until the assignment due date (each file uploaded overwrites the previous version). This will help you in self-reviewing and revising your submission until the due date. **No resubmissions will be allowed after the due date and time of the assignment.** Therefore, draft assignments submitted in this way will be regarded as the final version at the due date if you have not uploaded a subsequent, finalised version.

IMPORTANT: there are delays in the availability of subsequent Originality reports. For more details, see <https://www.student.unsw.edu.au/turnitin>

Grading and feedback

You will be provided with feedback on your assignment via Moodle. You will be marked according to the marking assessment criteria listed for that specific assessment task. The aim of any academic feedback for an assessment task is not only to grade your work. Importantly, it is also to help you to identify your strengths and weaknesses, and how you can improve and progress in your studies and professional abilities.

In addition to feedback, you will receive a mark that reflects the overall quality of the work you have submitted across the marking criteria. The marking criteria for assessments in this course are provided on Moodle.

Please note these grading criteria are:

- Not intended to be a **rigid formula** for interpreting your result. The descriptive criteria for each grade provides the basis for consistent standards within and across our courses while still

embracing academic judgement on how well you have achieved the standard required.

- Applied to **each assessment task** within a course. That is, the grading policy is used with each assessment task specified for a course. Your final grade for a course is dependent on the combined sum of the grades across the number of specified assessment tasks.
- Based on a **criterion-referenced assessment**. That is grades are awarded on how well a student meets the standard required for a particular assessment task, not on how well they do compared to other students in the course.

Feedback on assessment and review of results

If you believe the mark you've received for an assessment task doesn't reflect your performance you should first check you have grounds to seek a review: <https://student.unsw.edu.au/results>

In the first instance, you should discuss your performance with your Course Convenor. In your communication, you should clearly outline the reasons you are seeking clarification and do so against the marking criteria for the assessment.

Students may also formally apply to have their results reviewed. An application, which includes a justification for the review must be submitted through The Nucleus (<https://student.unsw.edu.au/results>) within 5 days of receiving the result. A review of results may result in an increase or decrease in marks.

Grading Basis

Standard

Requirements to pass course

In order to pass this course students must:

- Achieve a composite grade of at least 50 out of 100
- Meet any additional requirements specified in the assessment details section and on Moodle.

Course Schedule

Teaching Week/Module	Activity Type	Content
Week 0 : 20 May - 26 May	Intensive	Day 1. Monday 20 May - 9.30am - 4.30pm Module 1. Identifying and measuring health inequalities and inequities Module 2. Explaining determinants
	Intensive	Day 2. Tuesday 21 May - 9.30am- 4.30pm Module 2. Explaining determinants - continued Module 3. Actions to reduce or eliminate inequities in health
Week 1 : 27 May - 2 June	Homework	Readings and online activities Q and A forum available
Week 2 : 3 June - 9 June	Tutorial	Measuring inequalities Understanding social determinants of health Discussion of Assessment tasks Practice Discussion Forum due (non-assessed)
Week 3 : 10 June - 16 June	Homework	Readings and online activities Q and A forum available
Week 4 : 17 June - 23 June	Tutorial	Theories of inequalities and inequities and the implications for action Discussion of Assessment tasks Discussion forum due
Week 5 : 24 June - 30 June	Homework	Readings and online activities Q and A forum available Assessment 1 (debates paper) due
Week 6 : 1 July - 7 July	Other	Flexibility week - breathe, relax, recharge
Week 7 : 8 July - 14 July	Tutorial	Responding to current health inequities and the implications for action Discussion of Assessment tasks
Week 8 : 15 July - 21 July	Homework	Readings and online activities Q and A forum available Discussion forum due
Week 9 : 22 July - 28 July	Tutorial	Preventing future health inequities Discussion of Assessment tasks
Week 10 : 29 July - 4 August	Homework	Readings and online activities Q and A forum available Finalise and submit Assessment 3 (major report)

Attendance Requirements

Students are strongly encouraged to attend all classes and review lecture recordings.

General Schedule Information

The times and locations of classes can be found on myUNSW under Class Timetable.

Students enrolled in online courses should also refer to Moodle as some classes are not centrally timetabled (e.g., workshops) and will not appear on the timetable website.

The expected engagement for all UNSW 6UOC courses is 150 hours per term. This includes lectures, tutorials, readings, and completion of assessments and exam preparation (if relevant).

Course Resources

Prescribed Resources

Learning resources for this course consist of the following and are available on Moodle:

1. Course notes
2. Course readings (available on Leganto)
3. Lecture slides
4. Lecture recordings
5. Relevant course resources for each Module

There are no set text books for this course

Recommended Resources

Recommended resources for this course are provided on the course Moodle page.

ENDNOTE: As a UNSW student Endnote is freely available to you. If you don't already use Endnote you are recommended to download it and learn it now: <https://www.myit.unsw.edu.au/software-students>

You can find details about Endnote training here: <https://www.library.unsw.edu.au/research/support-for-yourresearch/managing-references>

Additional Costs

There are no additional costs associated with this course

Course Evaluation and Development

Student feedback is taken seriously, and continual improvements are made to the course based, in part, on such feedback.

We use student feedback from myExperience surveys to develop and make improvements to the course each year. We do this by identifying areas of the course that require development from both the rating responses and written comments. Please spare a few minutes to complete the myExperience surveys for this course posted at the top of the Moodle page at the end of term.

Other Useful Information

Academic Information

As a student of UNSW Medicine & Health you are expected to familiarise yourself with the contents of this course outline and the UNSW Student Code and policies and procedures related to your studies.

Student Code of Conduct

Throughout your time studying at UNSW Medicine & Health, you share a responsibility with us for maintaining a safe, harmonious and tolerant University environment. This includes within the courses you undertake during your degree and your interactions with the UNSW community, both on campus and online.

The [UNSW Student Code of Conduct](#) website provides a framework for the standard of conduct expected of UNSW students with respect to both academic integrity and your responsibility as a UNSW citizen.

Where the University believes a student may have breached the code, the University may take disciplinary action in accordance with the [Student Misconduct Procedure](#).

The [Student Conduct and Integrity Office](#) provides further resources to assist you to understand your conduct obligations as a student at UNSW.

Academic Honesty and Plagiarism

Academic integrity

UNSW has an ongoing commitment to fostering a culture of learning informed by academic integrity. All UNSW staff and students have a responsibility to adhere to the principle of

academic integrity, and ethical scholarship of learning is fundamental to your success at UNSW Medicine & Health.

Plagiarism, contract cheating, and inappropriate use of generative AI undermine academic integrity and are not tolerated at UNSW. For more information see the [Academic Integrity and Plagiarism toolkit](#).

In addition to the information you are required to review in your [ELISE training](#), UNSW Medicine & Health strongly recommends that you complete the [Working with Academic Integrity](#) module before submitting your first assessment task.

Referencing

Referencing is a way of acknowledging the sources of information that you use to research your assignments. Preferred referencing styles vary among UNSW Medicine & Health disciplines, so check your course Learning Management System (e.g. Moodle or Open Learning) page for information on preferred referencing styles.

For further information on referencing support and styles, see the Current Student [Referencing page](#).

Academic misconduct and plagiarism

At UNSW, academic misconduct is managed in accordance with the [Student Misconduct Procedure](#). Allegations of plagiarism are generally handled according to the [UNSW Plagiarism Management Procedure](#). Plagiarism is defined in the [UNSW Plagiarism Policy](#) and is not tolerated at UNSW.

Use of Generative AI and other tools in your assessment

UNSW has provided guiding statements for the [use of Generative AI in assessments](#). This will differ, depending on the individual assessment task, your course requirements, and the course stage within your program.

Your course convenor will outline if and how you can use Generative AI in each your assessment tasks. Options for the use of generative AI include: (1) no assistance; (2) simple editing assistance; (3) planning assistance; and (4) full assistance with attribution.

You may be required to submit the original generative AI responses, or drafts of your original

work. Inappropriate use of generative AI is considered academic misconduct.

See your course Moodle (or Open Learning) page for the full instructions for individual assessment tasks for your course.

Submission of Assessment Tasks

Special Consideration

In cases where illness, misadventure or other circumstances beyond your control will prevent you from submitting your assessment by the due date and you require an extension, you need to formally apply for [Special Consideration](#) through myUNSW.

UNSW has a **Fit to Sit/Submit rule**, which means that by sitting or submitting an assessment on the scheduled assessment date, you are declaring that you are fit to do so and cannot later apply for Special Consideration.

Timed online assessment tasks

If you experience a technical or connection problem during a timed online assessment, such as a timed quiz, you can apply for Special Consideration. To be eligible to apply you need to contact the Course Convenor and advise them of the issue immediately. You will need to submit an application for Special Consideration immediately, and upload screenshots, error messages or other evidence of the technical issue as supporting documentation. Additional information can be found on: <https://student.unsw.edu.au/special-consideration>

Examinations

Information about the conduct of examinations in your course is provided on your course Moodle page.

Other assessment tasks

Late submission of assessment tasks

UNSW has standard late submission penalties as outlined in the [UNSW Assessment Implementation Procedure](#), with no permitted variation. All late assignments (unless extension or exemption previously agreed) will be penalised by 5% of the maximum mark per calendar day (including Saturday, Sunday and public holidays).

Late submissions penalties are capped at five calendar days (120 hours). This means that a student is not permitted to submit an assessment more than 5 calendar days (120 hours) after the due date for that assessment (unless extension or exemption previously agreed).

Failure to complete an assessment task

You are expected to complete all assessment tasks for your courses. In some courses, there will be a minimum pass mark required on a specific assessment task (a “hurdle task”) due to the need to assure clinical competency.

Where a hurdle task is applicable, additional information is provided in the assessment information on your course Moodle page.

Feedback on assessments

Feedback on your performance in assessment tasks will be provided to you in a timely manner. For assessment tasks completed within the teaching period of a course, other than a final assessment, feedback will be provided within 10 working days of submission, under normal circumstances.

Feedback on continuous assessment tasks (e.g. laboratory and studio-based, workplace-based, weekly quizzes) will be provided prior to the midpoint of the course.

Any variation from the above information that is specific to an assessment task will be clearly indicated in the course and assessment information provided to you on your course Moodle (or Open Learning) page.

Faculty-specific Information

Additional support for students

The university offers a wide range of support services that are available for students. Here are some links for you to explore.

- The Current Students Gateway:<https://student.unsw.edu.au>
- Academic Skills and Support:<https://student.unsw.edu.au/academic-skills>
- Student support:<https://www.student.unsw.edu.au/support>

- Student Wellbeing, Health and Safety: <https://student.unsw.edu.au/wellbeing>

Mind Smart Guides are a series of mental health self-help resources designed to give you the psychological flexibility, resilience and self-management skills you need to thrive at university and at work.

- Mind Smart Guides: <https://student.unsw.edu.au/mindsmart>
- Equitable Learning Services: <https://student.unsw.edu.au/els>
- Guide to studying online: <https://www.student.unsw.edu.au/online-study>

Most courses in UNSW Medicine & Health use Moodle as your Learning Management System. Guidance for using UNSW Moodle can be found on the Current Student page. Difficulties with Moodle should be logged with the IT Service Centre.

- Moodle Support: <https://student.unsw.edu.au/moodle-support>

The IT Service Desk is your central point of contact for assistance and support with remote and on-campus study.

- UNSW IT Service Centre: <https://www.myit.unsw.edu.au/services/students>

Course evaluation and development

At UNSW Medicine & Health, students take an active role in designing their courses and their overall student experience. We regularly seek feedback from students, and continuous improvements are made based on your input. Towards the end of the term, you will be asked to participate in the [myExperience survey](#), which serves as a source of evaluative feedback from students. Your input to this quality enhancement process is valuable in helping us meet your learning needs and deliver an effective and enriching learning experience. Student responses are carefully considered, and the action taken to enhance educational quality is documented in the myFeedback Matters section of your Moodle (or Open Learning) course page.

School-specific Information

Additional Resources

Additional resources are available on the SPH website: <https://sph.med.unsw.edu.au/current-students/student-resources>

Subject guides

Use these guides as a quick and easy pathway to locating resources in your subject area. These excellent guides bring together the core web and print resources in one place and provide a one click portal into the online resources.

UNSW Library Subject Guides: <http://subjectguides.library.unsw.edu.au/subjectguides>

Public Health Subject Guide: <http://subjectguides.library.unsw.edu.au/publichealth>

Recording of lectures, tutorials and other teaching activities

Lectures, tutorials and other teaching activities *may* be recorded. Students should be advised that they are consenting to the recording by their enrolment in the course or participation in the activity. The purpose of audio and video recordings is to enhance the student experience by supporting engaged learning in an online teaching environment and ensure equitable access to all course resources for our students. If you have concerns about accessing course recordings, or being recorded, please contact the Course Convenor.

School Contact Information

School guidelines on contacting staff:

Course questions

All questions related to course content should be posted on Moodle or as directed by your Course Convenor.

In cases where email communication with course convenors is necessary, we kindly request the following:

- Use your official email address for any correspondence with teaching staff.
- We expect a high standard of communication. All communication should avoid using short-hand or texting language.

- Include your full name, student ID, and your course code and name in all communication.

Our course convenors are expected to respond to emails during standard working hours of Monday to Friday, 9am-5pm.

Administrative questions

If you have an administrative question about your program of study at the School please submit your enquiry online at [UNSW Ask Us](#).

Complaints and appeals

Student complaints and appeals: <https://student.unsw.edu.au/complaints>

If you have any grievances about your studies, we invite you to address these initially to the Course Convenor. If the response does not meet your expectations, you may then contact the School Grievance Officer, A/Prof Timothy Dobbins (t.dobbins@unsw.edu.au).
